<u>Unit Trust Loan Financing Statement</u>
Investing in a Unit Trust Fund with Borrowed Money Is More Risky than Investing with Your Own Savings. You should assess if loan financing is suitable for you in light

- of your objectives, attitude to risk and financial circumstances. You should be aware of the risks, which would include the following:

  The higher the margin of financing (that is, the amount of money you borrow for every Ringgit of your own money which you put in as deposit or down payment), the greater the loss or gain on your investment.
- You should assess whether you have the ability to service the repayments on the proposed loan. If your loan is a variable rate loan, and if interest rates rise, your total repayment amount will be increased. 2.
- If unit prices fall beyond a certain level, you may be asked to provide additional acceptable collateral (where units are used as collateral) or pay additional
- amounts on top of your normal instalments. If you fail to comply within the time prescribed, your units may be sold towards the settlement of your loan.

  Returns on unit trusts are not guaranteed and may not be earned evenly over time. This means that there may be some years where returns are high and other years where losses are experienced. Whether you eventually realise a gain or loss may be affected by the timing of the sale of your units. The value of units may

fall just when you want your money back even though the investment may have done well in the past.

This brief statement cannot disclose all the risks and other aspects of loan financing. You should therefore study the terms and conditions before you decide to take the loan. If you have doubts in respect of any aspect of this Risk Disclosure Statement or the terms of the loan financing, you should consult the institution offering the
