**Page 10 & 11 of the Replacement Information Memorandum – GENERAL RISKS OF INVESTING IN THE FUND**

The **Market Risk**, **Manager Risk**, **Mismatch Risk** and **Financing Risk** are hereby deleted and replaced with the following:

**Market Risk**

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.

**Manager's Risk**

This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.

**Country Risk**

Investments of the fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the net asset value or prices of the units to fall.”

**Page 11 & 12 of the Replacement Information Memorandum – SPECIFIC RISKS ASSOCIATED WITH THE INVESTMENT PORTFOLIO OF AmCASH PLUS**

The entirety disclosure under **SPECIFIC RISKS ASSOCIATED WITH THE INVESTMENT PORTFOLIO OF AmCASH PLUS** section is hereby deleted and replaced with the following:-

**Credit and Default Risk**

Credit risk relates to the creditworthiness of the issuers of the fixed income instruments and their expected ability to make timely payment of profit or interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instrument. In the case of rated fixed income instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments. This could adversely affect the value of the Fund.

THIS IS A THIRD SUPPLEMENTARY INFORMATION MEMORANDUM FOR AMCASH PLUS WHICH HAS TO BE READ IN CONJUNCTION WITH THE REPLACEMENT INFORMATION MEMORANDUM FOR AMCASH PLUS DATED 1 DECEMBER 2014, THE FIRST SUPPLEMENTARY INFORMATION MEMORANDUM DATED 1 APRIL 2015 AND THE SECOND SUPPLEMENTARY INFORMATION MEMORANDUM DATED 10 SEPTEMBER 2015.

#### **Interest Rate Risk**

Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income instruments. When interest rates rise, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when interest rates fall.

In order to mitigate interest rate risk, the Manager will need to manage the fixed income portfolio taking into account the coupon rate and time to maturity of the fixed income instruments.

#### **Liquidity Risk**

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

#### **Income Distribution Risk**

It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realized returns to enable income distribution. As per the SC Guidelines, distribution of income should only be made from realized gains or realized income.

***Note: The abovementioned risks which Sophisticated Investors should consider before investing into a unit trust fund should not be considered to be an exhaustive list. Sophisticated Investors should be aware that investments in a fund may be exposed to other risks of an exceptional nature from time to time.***
