## What are the possible outcomes of my investment?

Best Case	Capital appreciation and income distribution.
Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.
Worst Case	Capital loss and with no income distribution.

## What are the key risks associated with the Fund?

### General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Manager's Risk	This risk refers to the day-to-day management of a fund by the manager which will impact the performance of a fund.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deeds, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which a fund invests in.

### Specific risks associated with the Fund

Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income instruments and their expected ability to make timely payment of profit or interest and/or principal. Default risk relates to the risk that an issuer of a fixed income instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments.
Rate of Return Risk	Rate of return risk refers to the impact of rate of return changes on the valuation of fixed income instruments. When rate of return rises, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when rate of return falls.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of the Unit Holders' investments in the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Emerging Markets Risk	The Fund may be investing in Shariah-compliant securities in emerging markets which may be subject to higher political, regulatory and liquidity risks compared to these risks in developed markets.
Currency Risk	As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments.
Shariah Non-Compliance Risk	This is the risk of the Fund not conforming to Shariah Investment Guidelines. Non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfill a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.

**Note: The abovementioned risks which investors should consider before investing into the Fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser.
