The Fund performance is calculated based on the net asset value per unit of the Fund. Average total return of the Fund and its benchmark for a period is computed based on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Fund
PerformanceFor the financial period under review, the Fund registered a return of 0.95%
comprising of 0.07% capital growth and 0.88% income distributions.

Thus, the Fund's return of 0.95% has underperformed the benchmark's return of 1.05% by 0.10%.

As compared with the financial year ended 31 March 2024, the net asset value ("NAV") per unit of the Fund increased by 0.07% from RM1.0164 to RM1.0171, while units in circulation remains unchanged at 1,104,615,822 units.

The following line chart shows comparison between the annual performances of AmIncome Institutional SRI 1 (formerly known as AmIncome Institutional 1) and its benchmark, TWRR/MMGS/BPAM, for the financial years ended 31 March.

Rebates and Soft Commission		, the management cor ons conducted for the F	npany did not receive ^F und.	soft commissions by			
Market Review	In April, Malaysian bond market weaken following a sell-off in United States Treasuries (UST) as sticky inflation and a resilient labor market have given more reasons for the US Federal Reserve (US Fed) to stand pat on key rates. Apart from that, thin market liquidity and rising geopolitical risk in the Middle East also dented local bond market sentiment. Premised on all the developments above, MGS curve was repriced higher by 6 to 16 basis points (bps) on a month-on-month (MoM) basis.						
	lower-than-expected US Job data released at the beginning of the month and dovish tone from the US Fed in its post-FOMC meeting speech. While Bank Negara Malaysia (BNM) maintained the Overnight Policy Rate (OPR) at 3.00% during policy meeting with a neutral monetary stance, positive sentiment in local bond market was reflected in the three sovereign bond auctions which garnered strong demand and recorded bid-to-cover (BTC) ratio between 1.965x to 3.085x. As investors were adjusting their view that the US Fed is not in a rush to cut rates, local bonds weakened slightly towards end of the month, reflecting the trend in the UST market. Overall, the MGS curve bull-flattened in May with yields declined by 2-12 bps on a MoM basis.

A statement that the fund has complied with Guidelines on Sustainable And Responsible Investment Funds during the reporting period	For the financial period under review, the Fund has complied with the requirements of the Guidelines on Sustainable and Responsible Investment Funds (SRI).
Descriptions on sustainability considerations that have been adopted in the policies and strategies employed	As a SRI qualified fund, the investments of the Fund are subjected to the integration of the sustainability considerations. Please refer to " Strategies and Policies Employed " section in this report for further information on the Fund's sustainability considerations.
	the SRI Fund's policies and strategies achieved during the reporting period ude, but are not limited to the following (a-g) :-
(a) A review on sustainability considerations of the SRI Fund's portfolio	For the financial period under review, the Fund incorporated sustainability considerations in securities or instruments selection (including instruments issued under their respective green, social and sustainability (GSS) bond framework), by investing in companies which are well governed and with positive environmental and social impact. Issuers of such securities or instruments are evaluated based on the sustainability considerations as disclosed in the section "ESG Assessment Methodology" and their disclosure of information pertaining to environmental and social impact.
(b) The proportion of underlying investments that are consistent with the SRI Fund's policies and strategies	For the financial period under review, the Fund invested at least two-thirds (2/3) of the NAV of the Fund in securities or instruments (excluding MGS, cash, deposits and money market instruments) that are in line with the sustainability considerations adopted by the Fund.
(c) Where the SRI Fund's underlying investments are inconsistent with its policies and strategies, descriptions on steps undertaken to rectify the	Not applicable as the Fund's underlying investments are consistent with its policies and strategies. That said, if the Fund's investments become inconsistent with its investment strategies or the Fund breaches the two thirds (2/3) asset allocation threshold in investments that are subjected to sustainability considerations, the Fund Manager will dispose and/or replace the investment(s) within seven (7) business days from the date of the breach.

inconsistency	
(d) Actions taken in achieving the SRI Fund's policies and strategies	The Fund Manager continuously monitor and if required, rebalance the investments to ensure that at least two-thirds (2/3) of the NAV of the Fund are maintained in securities or instruments (excluding Malaysian government securities, cash, deposits and money market instruments) that are in line with the sustainability considerations adopted by the Fund.
(e) A comparison of the SRI Fund's performance against the designated reference benchmark (if available)	Not applicable since the fund does not have a designated SRI benchmark.
(f)	Sustainability and Responsible Investment and Impact Risk
Descriptions on sustainability risk considerations and the inclusion of such risks in	As the Fund has an intention to generate positive sustainable and responsible impact alongside a financial return (impact), the investor must be able to accept temporary capital losses due to the potentially restricted number of companies that the Fund can invest in due to those companies which may not meet the sustainability considerations requirement and, consequently, should view investment in the Fund as a long-term investment.
the SRI Fund's investment decision making process	The Fund may seek to exclude holdings deemed inconsistent with the sustainability considerations. As a result, the investments of the Fund will be more limited than other funds that do not apply sustainability considerations. The Fund may be precluded from purchasing, or required to sell, certain investments that are inconsistent with its investment policy and sustainability considerations which might otherwise be advantageous to hold. The incorporation of sustainability considerations could result in performance that is better or worse than the performance of the other funds depending on the performance of the excluded investments.
	This risk is mitigated via the investment strategy of the Fund such as by imposing minimum credit rating, active tactical duration management and by analyzing general market conditions. In addition, the Manager will use models that analyze and compare expected returns and assumed risk.
	The Manager will also focus on securities or instruments that would deliver better returns and will consider obligations with more favourable or improving credit or industry outlook that provides the potential for capital appreciation.
	Greenwashing Risk
	Greenwashing is defined as making false, misleading or unsubstantiated claims in relation to environmental, social and governance credential of an investment product. The Fund may inadvertently invest into such products, without prior knowledge of the fraudulent claims. As greenwashing could result in reputational risk, regulatory fines, and/or withdrawal of the products, there could be a negative impact on the value of the Fund.
	In mitigating the greenwashing risk, there are governance and guidelines in place for assessing the sustainability of the sovereign or corporate issuer and depository

	financial institution. The ESG score prescribed to the sovereign or corporate issuer and depository financial institution are reviewed and approved by appropriate approving authorities internally, and updated periodically, i.e. at least once a year.
(g) Any other information, considered necessary and relevant by the issuer	No additional information deemed necessary to be disclosed.
Where the SRI Fund has provided previous periodic reviews, a comparison between the current and at least the previous reporting period	For the current reporting period and the previous reporting period, the Fund has complied with the requirements of the Guidelines on Sustainable and Responsible Investment Funds (SRI) by investing at least two-thirds (2/3) of the NAV of the Fund in securities or instruments that are in line with the sustainability considerations adopted by the Fund.
