General Investment Risks

Market Risk	This is the risk of prices of assets falling in response to general market factors such as economic factors, socio-political environment, regulatory factors and broad investor sentiment.
Inflation Risk	This is the risk that investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation.
Manager Risk	This is the risk of the manager making poor investment decisions which may adversely affect the performance of the fund.
Non-Compliance Risk	This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund.
Mismatch Risk	This is the risk that the fund chosen by the investor may not be suitable for the needs and circumstances of the investor.
Financing Risk	This is the risk of investing with borrowed money, which includes the investor's inability to service the loan repayments and the adverse impact of an increase in interest rates on the loan repayments, where the investor may be subject to higher loan repayment installments.

Specific Risks associated with the Fund

Credit (Default) Risk	This is the risk of issuers of fixed income instruments defaulting on their payment obligations (i.e. principal and/or coupon/profit obligation) which in turn would adversely affect the NAV of the Fund.
Rate of Return Risk	Rate of return risk refers to the impact of rate of return changes on the valuation of fixed income instruments. The reverse may apply when rate of return falls.
Concentration Risk	This is the risk that the Fund may be overly concentrated in a few issuer.
Liquidity Risk	The Fund holding investments that are illiquid or difficult to dispose of would be exposed to liquidity risk, which in this context refers to the inability of the Fund to take advantage of potentially better pricing that would be available if there were more buyers and the securities are more actively traded in the market.
Shariah Non-Compliance Risk	This is the risk of the Fund not conforming to Shariah investment guidelines. Non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.
Income Distribution Risk	The distribution of income is not guaranteed.
