3 THE FUND'S DETAILED INFORMATION

3.1 Fund Information

Fund Name	AmSingle Bond* Series 1. <i>*Single bond refers to the Fund's investment strategy to purchase a single credit bond, i.e. bonds that are issued by a single issuer.</i>
Base Currency of the Fund	USD.
Fund Type	Income.
Fund Category	Bond (Wholesale).
Early Termination Feature of the Fund	<p>The Fund has an Early Termination feature. The Fund's Early Termination triggers when the Fund holds 100% in money market instruments, deposits and cash. This occurs when the issuer of the bond calls the bond, the bond matures or when the Manager disposes off all its holdings of the bond in view of the continued deterioration in the credit fundamentals of the bond which would affect the performance of the Fund and hence, leading to the Manager exercising its discretion to act in the best interests of the Unit Holders. Once any of the above criteria is met and in accordance to the requirements of the deed for the Fund, the Manager has the option to exercise the right to trigger an Early Termination without requiring a Unit Holders' meeting by issuing a notice to Unit Holders on the next Business Day of the day when above criteria is met.</p> <p>In the event of an Early Termination, the Fund will be terminated, without having to seek the Unit Holder's prior approval, on the Early Termination Date, which will fall on a Business Day as decided by the Manager.</p>
Investment Objective	<p>The Fund seeks to provide regular income over the medium to long-term.</p> <p><i>Note: Any material change to the investment objective of the Fund would require Unit Holders' approval.</i></p>
Investment Strategy	<p>The Fund seeks to achieve its investment objective by investing primarily into a single credit bond. The remaining NAV of the Fund will be in liquid assets such as cash, deposits and money market instruments either directly or via collective investment schemes.</p> <p>The Manager will undertake a top-down and bottom-up investment approach to identify investment opportunities.</p>

	<p>Macroeconomic trends and market analysis are the important considerations in deriving the top-down perspectives on interest rate outlook, fixed income markets and currency movements. For its bottom-up approach, the Manager will conduct analysis on the issuers to assess its ability to service its debt obligations.</p> <p>The fundamental investment process will be driven by two (2) main factors:</p> <ul style="list-style-type: none"> • Credit quality of the bond; and • Yield of the bond. <p>The Manager will aim to strike an overall between these two (2) factors to deliver the best risk-adjusted return to Unit Holders.</p> <p>The Fund's investment in the bond would consist of a corporate bond (including hybrid securities such as additional tier-1 (AT1) securities and contingent convertible capital instruments known as CoCo bonds), government bond and quasi government bond. The selection of the bond will not be constrained by credit ratings of the issuance. However, the selection will depend largely on its quality, where the issuer displays strong ability to meet its financial obligations, healthy cash-flow, the collateral type, value, claims, priority as well as offer highest safety for timely payment of interest and principal.</p> <p>The Fund may utilise derivatives (such as forward contracts) on a rolling basis solely for the purpose of hedging the Fund's exposure to foreign currency, if any. The Fund may invest in countries where the regulatory authority is an ordinary or associate member of IOSCO.</p>
<p>Asset Allocation</p>	<ul style="list-style-type: none"> • A minimum of 60% of NAV to be invested in bond; and • A maximum of 40% of NAV to be invested in liquid assets such as cash, deposits and money market instruments either directly or via collective investment schemes. <p><i>Note: The Manager may also deviate from the above asset allocation for the first two (2) months from the Fund's Commencement Date. The Fund may reduce the exposure in the bond and increase its investments in liquid assets such as cash and other permitted investments in adverse market, economic, political or any other condition which include times of market weakness, high redemption and as part of the temporary defensive strategy as well as for the</i></p>

	<p><i>purpose of winding up the portfolio to accommodate early termination of the Fund. During this period, the Fund's investment may differ from the stipulated asset allocation.</i></p> <p><i>The Fund may also deviate from the above asset allocation if the issuer of the bond calls the bond, the bond matures or when the Manager disposes off all its holdings of the bonds and is required to replace the bond with another. In such an event, the Fund will not deviate more than ninety (90) days from the above stipulated asset allocation.</i></p>
Performance Benchmark	<p>AmBank (M) Berhad 12-month conventional fixed deposit rate (fixed as at Commencement Date).</p> <p><i>You may visit www.aminvest.com or call us at (03) 2032 2888 to find out about the AmBank (M) Berhad 12-month conventional fixed deposit rate as at Commencement Date. The risk profile of the Fund's investments is higher than the risk profile of the AmBank (M) Berhad 12-month conventional fixed deposit rate and consequently, the Fund is expected to outperform the AmBank (M) Berhad 12-month conventional fixed deposit rate. There is no guarantee that the Fund's performance will always outperform the benchmark.</i></p>
Income Distribution Policy	<p>Depending on the level of income the Fund generates and at the discretion of the Manager, the Fund may provide distribution on an annual basis.</p> <p><i>Note: Income distribution (if any) will be in the form of cash.</i></p>
Investor Profile	<p>The Fund is suitable for Sophisticated Investors:</p> <ul style="list-style-type: none"> • seeking an investment that seeks to provide income; • have a medium to long-term investment horizon; and • seeking potentially higher returns than the AmBank (M) Berhad 12-month conventional fixed deposit rate (fixed as at Commencement Date).

3.3 Additional Information In Relation to the Bond

Single credit bond refers to bonds that are issued by a single issuer. The Fund may invest in one or a combination of more than one of the following types of bond –

- **Bullet Bond** – A bullet bond is a bond whose entire principal is paid at once on the specified maturity date. Bullet bonds cannot be early redeemed by the issuer, as such they are deemed non-callable.
- **Perpetual Bond** – Perpetual bonds are bonds which have no maturity date. Issuers pay coupons on perpetual bonds forever, and they do not have to redeem the principal.
- **Callable Bond** – Bonds with a call feature, or callable bonds, are bonds that can be early redeemed by the issuer prior to its maturity date.
- **AT1 CoCo Bond** – Additional Tier 1 (AT1) securities and contingent convertible capital instruments known as CoCo bonds are hybrid perpetual securities which are subordinated (rank lower) to debt but senior to common shares. These bonds do not have a predefined maturity but are often callable after a call protection period. In addition, these bonds have cancellable coupons, and may be converted into shares or be written off upon the occurrence of a trigger event. These securities are treated as the issuer’s regulatory capital but does not grant investors voting rights.
- **Deferable Coupon Bond** – The issuer of a deferable coupon bond may elect to defer any payment of coupon for a period of time and this deferral may be

cumulative or non-cumulative. If the terms of the bond are such that coupons are deferrable and non-cumulative, there is a risk that the bondholder may not get any returns on the investment. However, these bonds are normally structured to satisfy certain conditions before the issuer is entitled to defer payment of coupons, such as there can be no declaration or payment of dividends in respect of lower ranked securities, e.g. common shares.

The bond is likely to be called when:

- Interest rates fall adequately, allowing the issuer to refinance the bond at a lower rate;
- The issuer's credit quality improves adequately, allowing them to raise capital at cheaper rates relative to the bond;
- The issuer's capital position improves, allowing them to redeem the bond; and
- Regulatory changes make it beneficial for the issuer to call the bond.

In contrast, if interest rates were to rise, the issuer's credit quality or capital position worsens, or if regulatory changes were disadvantageous, it would make the bond less likely to be called by the issuer.

The following scenarios present different circumstances under which the bond is likely or not likely to be called.

- **Scenario 1** – The bond has a coupon rate of 5.00% p.a.. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 4.00% p.a.. In this case, the issuer is likely to call the bond and re-issue at the lower rate of 4.00% p.a. as it is now cheaper to re-issue the bond.
- **Scenario 2** – The bond has a coupon rate of 5.00% p.a.. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 6.00% p.a.. It is then unlikely that the issuer will call the bond as it is now more expensive to re-issue the bond.
- **Scenario 3** – The bond has a coupon rate of 5.00% p.a.. Upon reaching the first Call Date, the issuer is able to refinance the bond at a coupon rate of 4.00% p.a.. However, the issuer does not have sufficient capital to redeem the bond and therefore is not likely to call the bond.

When the bond is called, the issuer redeems the bond from bondholders at the call price. The call price is determined upfront upon issuance and could be at par (100), at a discount (below 100) or at a premium (above 100). If the bond is called at a price lower than the stipulated call price, this is considered a default. If the bond is called, condition for an Early Termination event is satisfied and the Manager will have the option to fully trigger the Early termination event.

A trigger / loss-absorption event is when the issuer may be required to cancel any accrued coupon that is owed to investors, convert the bonds into shares of the issuing company or permanently write down partially or in full the principal amount of the bond. The conditions which satisfy a trigger event depends on each bond terms, but usually includes a breach of any capital adequacy ratio, a declaration by the relevant regulatory authority that a write-off is necessary (without which the issuer would become non-viable), a public injection of funds or equivalent support without which the issuer would become non-viable, or a breach of any other quantitative threshold used to gauge the financial viability of the issuer, e.g. Common Equity Tier 1 (CET1) Ratio.

For example, an AT1 CoCo bond is issued with terms specifying that if the issuer's CET1 Ratio falls below 5.00% at any given time, then a trigger event will occur. Assuming that the issuer's CET1 Ratio breaches the threshold of 5.00%, the bond may be converted into shares or partially / fully written-off in order to raise the issuer's CET1 Ratio back to the minimum level of 5.00%.

4 RISK FACTORS

All investments carry some degree of risk. Therefore, before making an investment decision, you may consider the different types of risk that may affect the Fund or you individually.

General risks associated with investing in a wholesale fund	
Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Inflation Risk	This is the risk that Sophisticated Investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce Sophisticated Investors' purchasing power even though the value of the investment in monetary terms has increased.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Non-Compliance Risk	<p>This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund when the manager or the trustee takes action to rectify the non-compliance. For example, non-compliance could occur due to factors such as human error or shortfalls in operational and administrative processes, or external factors such as market movements.</p> <p>This risk may be mitigated by having sufficient internal controls in place to ensure compliance with all applicable requirements at all times.</p>
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower net asset value per unit as compared to the net asset

General risks associated with investing in a wholesale fund	
	<p>value per unit at the point of purchase towards settling the loan / financing.</p> <p><i>Note: The Manager does not provide financing for the purchase of units of the Fund. However, if an investor obtains financing from other providers, this is the risk that the investor should be aware of.</i></p>
Country Risk	<p>Investments of the fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the net asset value or prices of units to fall.</p>

Specific risks associated with the investment portfolio of the Fund	
Interest Rate Risk	<p>Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income instruments. When interest rates rise, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when interest rates fall.</p> <p>In order to mitigate interest rate risk, the Manager will need to manage the fixed income portfolio taking into account the interest rate and time to maturity of the fixed income instruments.</p> <p>For investment in deposits and money market instruments, the rise or fall of interest rates will not affect the value of the Fund if such investments are placed and held until the maturity date of the deposits and money market instruments. However, if the Fund rollovers the investment in deposits and money market instruments with lower interest rate, the Fund may be subject to interest rate risk which may affect the total return of the Fund.</p>
Income Distribution Risk	<p>It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realized returns to enable income distribution. Distribution of income should only be made from realised gains or realised income.</p>
Liquidity Risk	<p>Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the</p>

Specific risks associated with the investment portfolio of the Fund	
	Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfil a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.
Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income instruments or money market instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instruments or money market instruments. In the case of rated fixed income instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments. This could adversely affect the value of the Fund.
Currency Risk	<p>As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.</p> <p>The Manager may at its discretion hedge the currency of its foreign investments against the base currency of the Fund to mitigate currency risk for the benefit of the Fund. Note that while hedging assists with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well.</p>
Early Termination Risk	This is the risk of investor's investment in the Fund being "terminated" earlier than expected, in the event it was launched and subsequently achieving early termination requirement. In such cases, investors may have to reinvest the monies returned to them into other investment vehicles or other investment instruments. These other investments in turn may not be able to match the rate of return that would

Specific risks associated with the investment portfolio of the Fund	
	have been provided by the Fund had the Fund not been terminated early.
Concentration Risk	The Fund invests in a single credit bond. Any adverse effect on the bond will affect the Fund as well. The performance of the Fund is also dependent on the performance of the bond. This risk, however, may be mitigated when the Manager is allowed to take temporary defensive position in response to any adverse market conditions, or when the Manager is able to replace the single credit bond with another.

Note: The abovementioned risks which Sophisticated Investors should consider before investing into the Fund should not be considered to be an exhaustive list. Sophisticated Investors should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

Risk Management Strategy

Risk management of the Fund forms an integral part of the investment process. The Fund's portfolio is constructed and managed within pre-determined guidelines including risk returns trade-off, which will be reviewed periodically by the Manager. Assessment of risk is an important part of the asset allocation process. The investment team of the Manager has the discretion to select instruments / securities from the authorised investment list.

5 FEES, CHARGES AND EXPENSES

If these fees, charges and/or expenses are subject to any Taxes, such Taxes shall be borne and payable by the Unit Holders and/or the Fund (as the case may be) at the prevailing rate, including any increase or decrease to the rate, in addition to the fees, charges and/or expenses stated herein.

5.1 Charges

This table describes the charges that you may **directly** incur when you buy or redeem units of the Fund (*rounded to 2 decimal points*):

Entry Charge	Distribution Channel	Entry Charge
	Direct Sales	Up to 2.00% of the NAV per unit of the Class(es).
	IUTA	Up to 2.00% of the NAV per unit of the Class(es).
	<p><i>Notes:</i> There will be no entry charge payable by AmBank Group staff. Sophisticated Investors are advised that they may negotiate for lower entry charge prior to the conclusion of sales. Switching Fee

Switching between funds managed by the Manager

Unit Holders are only allowed to switch to other funds where the currency denomination is the same as the Class of the Fund switched out. For switches between any of the funds managed by the Manager, Unit Holders will be charged on the differences of the entry charge between funds switched, which is up to a maximum of 6% of NAV per unit of the fund switched into. No entry charge will be imposed if the fund to be switched into has a lower entry charge.

Switching between Class(es) of the Fund

Unit Holders are not allowed to switch between Class(es).

5.2 Ongoing Fees and Expenses

Due to the multiple Classes in the Fund, the fees and expenses for the Fund are apportioned based on the size of the Class relative to the whole Fund. This means the multi-class ratio ("MCR") is calculated by taking the "Opening Value of a Class" for a particular day and dividing it with the "Opening Value of the Fund" for that same day. This apportionment is expressed as a ratio and calculated as a percentage.

As an illustration, assuming there is an indirect fee chargeable to the Fund of USD100 and the size of the RM Class is 40%, RM-Hedged Class is 30%, USD Class is 15% and SGD Class is 15% of the Fund, the ratio of the apportionment based on the percentage will be 40:30:15:15 (RM:RM-Hedged:USD:SGD) i.e. 40% being borne by RM Class, 30% being borne by RM-Hedged Class, 15% being borne by USD Class and SGD Class respectively.

"Opening Value of the Fund" refers to the NAV of the Fund before income and expenses.

"Opening Value of a Class" refers to the NAV of a Class before income and expenses.

The fees and expenses that you may **indirectly** incur are as follows.

(a) Annual Management Fee

An annual management fee of up to 0.50% p.a. of the Fund's NAV is charged and then apportioned to each Class based on the MCR. The management fee is calculated on a daily basis and will be paid monthly to us. An illustration of the calculation and apportionment of the daily management fee is as follows:

Assuming the NAV of the Fund is USD100 million, then the daily accrued management fee for the day would be:

	<u>USD</u>
Investments	60,000,000.00
Others (Liquid assets)	40,000,000.00
NAV (before fees)	<u>100,000,000.00</u>

Management fee for the day:

$$[(\text{Investments} + \text{Liquid assets}) \times \text{Management fee}] \div \text{Number of days in a year}$$

$$= (\text{USD}100,000,000.00 \times 0.50\%) \div 365 \quad 1,369.86$$

Class-level apportionment

(assumed ratio: RM:RM-Hedged:USD:SGD, 40:30:15:15)

RM Class	547.94
RM-Hedged Class	410.96
USD Class	205.48
SGD Class	205.48
Total	1,369.86

(b) Annual Trustee Fee

The Trustee is entitled to an annual trustee fee for acting as trustee for the Fund. This fee is calculated daily and paid monthly. The trustee fee is up to 0.03% p.a. of the NAV of the Fund (excluding foreign sub-custodian fee and charges, where applicable). An illustration of the trustee fee per day is as follows:

Assuming the NAV of the Fund is USD100 million and the trustee fee is 0.03% p.a. of the NAV of the Fund, then the daily accrued trustee fee would be:

	<u>USD</u>
Trustee's fee for the day charged to the Fund:	
(NAV of the Fund x Trustee fee) ÷ Number of days in a year	
= (USD100,000,000.00 x 0.03%) ÷ 365	82.19

Class-level apportionment

(assumed ratio: RM:RM-Hedged:USD:SGD, 40:30:15:15)

RM Class	32.87
RM-Hedged Class	24.66
USD Class	12.33
SGD Class	12.33
Total	82.19

(c) Fund Expenses

The Manager and the Trustee may be reimbursed out of the Fund for any cost reasonably incurred in the administration of the Fund. The Fund's expenses currently include but are not limited to audit fees, tax agent's fees, printing and postages of annual and quarterly reports, bank charges, investment committee fee for independent members, lodgement fees for Fund's reports, outsourced fund accounting fee, foreign custodians' charges (if any) in respect of any foreign investments of the Fund, fees paid to brokers or dealers (if any) and other expenses as permitted by the Deed.

THERE ARE FEES AND CHARGES INVOLVED AND SOPHISTICATED INVESTORS ARE ADVISED TO CONSIDER THEM BEFORE INVESTING IN THE FUND.

6 TRANSACTION INFORMATION

6.1 Valuation of Assets

In undertaking any of its investments, the Manager will ensure that all the assets of the Fund are valued at fair value in compliance with the SC guidelines and relevant laws at all times. Investments of the Fund are valued in accordance to the following:

- Listed fixed income instruments and quoted on an exchange
The valuation for investment in listed fixed income instruments shall be determined by reference to the market price (i.e. official closing price or last known transacted price on the eligible market on which the investment is quoted).

However, if –

- (a) the market price does not represent the fair value of the fixed income instruments, for example during abnormal market conditions; or
- (b) no market price is available, including in the event of a suspension in the quotation of the fixed income instruments for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee,

then the fixed income instruments should be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

- Unlisted fixed income instruments
For unlisted RM denominated fixed income instruments, valuation is based on prices provided by the Bond Pricing Agency (BPA) registered with the SC or where prices are not available from BPA, the average indicative yield quoted by three (3) independent and reputable institutions. Where the Manager is of the view that the price quoted by BPA for a specific fixed income instrument differs from “market price” by more than 20 basis points, the Manager may use the “market price”, provided that the Manager:
 - (a) records its basis of using a non-BPA price;
 - (b) obtains necessary internal approvals to use the non-BPA price; and
 - (c) keeps an audit trail of all decisions and basis for adopting the “market yield”.

For unlisted foreign currency denominated fixed income instruments, valuation is based on the Refinitiv Evaluated Pricing quoted by Refinitiv. Where Refinitiv’s prices are not available, these unlisted foreign currency denominated fixed income securities will be valued at fair value, as determined in good faith by the Manager based on the method or bases verified by the Auditor of the Fund and approved by the Trustee.

- Liquid assets and money market instruments
The value of any investment in liquid assets and deposits placed with financial institutions shall be determined on each Business Day, with reference to the principal value of such investments and the accrued income for the relevant period.

For liquid assets and money market instruments (such as negotiable certificates of deposits and promissory notes), the valuation is based on marked to market prices as provided by the counterparty that issues the instruments.

For money market instruments with remaining term to maturity of not more than ninety (90) calendar days at the time of acquisition, amortised cost accounting shall be used. The Manager shall have in place adequate measures and safeguards to properly address relevant risks associated with the use of amortised cost accounting.

- **Derivatives**

The valuation is based on marked to market prices. The methods or bases of valuation will have to be verified by the Auditor of the Fund and approved by the Trustee.

6.2 Pricing and Valuation Points

The Fund adopts a single pricing policy i.e. subscription and redemption of units will be carried out at the NAV per unit. The valuation point of the Fund will be on daily basis (e.g. each business day).

The Fund also adopts forward pricing which means price for units will be calculated at the next valuation point after the complete documentation is received by the Manager.

Valuation point refers to such time(s) on a Business Day as may be decided by the Manager wherein the NAV per unit of the relevant Class(es) is calculated.

Since the Fund may invest in foreign markets, the valuation of the Class(es) will be carried out on the next Business Day (T+1) by 5.00 p.m. This is to cater for the currency translation of the foreign securities/instruments to the Fund's base currency based on the bid exchange rate quoted by Bloomberg or Refinitiv at 4.00 pm (UK time) which is equivalent to 11.00 pm or 12.00 am midnight (Malaysian time) on the same day, or such other time as stipulated in the Investment Management Standards issued by the Federation of the Investment Managers Malaysia (FIMM).

A Sophisticated Investor will buy units at the NAV per unit of the relevant Class as at the next valuation point after an instruction for purchase is received plus applicable entry charge of the Class; and redemption will be calculated based on the NAV per unit of the relevant Class as at the next valuation point after an instruction for redemption is received.

Incorrect Pricing

In the event of any incorrect pricing of units of the Class(es), the Manager shall take immediate remedial action to rectify the incorrect pricing. Where the incorrect pricing:

- (i) is equal or more than zero point five per centum (0.50%) of the NAV per unit; and
- (ii) the total impact on an individual account is less than RM 10.00 or its foreign currency equivalent in absolute amount.

then the Manager shall reimburse the relevant Class and/or the affected Unit Holder in the following manner:

- (a) where the error is as a result of over valuation (i.e. the price quoted is higher than the actual price), the Manager shall reimburse:
 - (i) the relevant Class (for the difference between the redemption amount paid out by the relevant Class and the amount per the amended valuation); and/or
 - (ii) the Unit Holders (for the difference between the value of subscription amount paid by the Unit Holder and the amount per the amended valuation).
- (b) where the error is as a result of under valuation (i.e. the price quoted is lower than the actual price), the Manager shall reimburse:
 - (i) the relevant Class (for the difference between the value of subscription amount paid by the Unit Holder and the amount per the amended valuation); and/or
 - (ii) the Unit Holders (for the difference between the redemption amount paid out by the relevant Class and the amount per the amended valuation).

Subject to any regulatory requirements, the Manager shall have the right to amend, vary or revise the above said limits or threshold from time to time.

Policy on rounding adjustment

The NAV per unit for the Fund is rounded to four (4) decimal points. Redemption proceeds, units created, fees and charges are rounded to two (2) decimal points.

NAV per unit of the Class(es)

Due to the multiple Classes in the Fund, the valuation of the Fund will be done in the Fund's base currency i.e. USD. As such, all assets and/or cash that are not denominated in USD will be converted to USD for valuation purposes. The foreign exchange rate used for this purpose shall be based on the bid exchange rate quoted by Bloomberg or Refinitiv at 4.00 pm (UK time) which is equivalent to 11.00 pm or 12.00 am midnight (Malaysian time) on the same day, or such other time as stipulated in the Investment Management Standards issued by the FIMM.

The following is a hypothetical example of the computation of the NAV per unit in Class currency at each valuation point based on the Multi Class Fund ("MCF") Ratio with the assumption that the investment has been made in RM-Hedged Class and USD Class:

This means the MCF Ratio is calculated by taking the Opening Value of a Class divided by the Opening Value of the Fund. This apportionment is expressed as a ratio and calculated as a percentage.

Notwithstanding the aforesaid, if the Fund is left with no Unit Holders, the Manager shall be entitled to terminate the Fund.

Upon the termination of the trust by the Manager, the Manager shall as soon as practicable, give to each Unit Holder of the Fund being wound up a notice of such termination in accordance with the relevant laws; the Manager shall notify the existing Unit Holders in writing of the following options:
