Distribution/ Unit splits	There is no income distribution and unit split declared for the financial period under review.
State of Affairs	The Fund was dormant until injections at the end of May 2024. The Fund started bond purchase following the injection.
Rebates and Soft Commission	During the period, the management company did not receive soft commissions by virtue of transactions conducted for the Fund.
Market Review	Asian Dollar Bonds saw positive performance in August, driven by the bull steepening of the United States Treasury (UST) curve as economic data releases pointed towards a cooler economy with two major data points, United States (US) Nonfarm Payrolls and inflation missed consensus expectation.
	At the Federal Open Market Committee (FOMC) meeting held on 18 September 2024, the United States (US) Federal Reserve (Fed) delivered a 50 basis points (bps) cut and brought the Fed Target Rate (upper bound) to 5.00%. The rate cut signalled confidence of easing inflation pressures in the US economy and some concern of being "behind the curve". The decision was uncontroversial with the first dissenting voice (against the size of the cut) in the FOMC since 2005 with 11:1 vote for the rate cut.
	The dot plot pencils-in a further 50bps cut in 2024 and another 100bps cut in 2025, with most economists calling for 25bps cuts at each of the upcoming Fed meetings on 7 November 2024 and 18 December 2024.
	The Institute of Supply Management (ISM) Services Purchasing Managers' Index (PMI) in the US jumped to 54.9 in September 2024, up from 51.5 in August and above the forecast of 51.7. This reading indicated the strongest growth in the services sector since February 2023, driven by faster increases in business activity, new orders, and inventories. The Fed Chair, Jerome Powell commented that if economic data remained consistent, two more rate cuts could come this year but in smaller, 25 basis points (bps) increments. Powell also said that the recent 50bps cut from the Fed should not be understood as a sign that the central bank will keep cutting rates aggressively.
	After prior two months of disappointment, the September US employment report by the US Bureau of Statistics turned in a positive surprise as nonfarm payrolls came in well above expectations at 254,000, the highest since March 2024 (310,000). This was significantly above the consensus of 150,000 and a significant rebound from the upwardly revised 159,000 in August. Adding to the positive hiring sentiment was the upward revision of 72,000 for the payrolls of July and August. Meanwhile, the unemployment rate unexpectedly eased to 4.10% in September (August: 4.20%) for a second straight month.

Market Outlook

With the start of the Federal Reserve (Fed) rate-cutting cycle, emerging markets will be beneficiaries of United States Dollar (USD) softness and the return of foreign fund flows into emerging markets. Encouraging economic data in the United States (US) which raised prospects of a soft landing for its economy, coupled with China's stimulus combo and call for stronger stimulus for markets should provide positive support to equities.

However, the path could be volatile. In the near term, US Presidential Election in November 2024 will be the limelight, given the uncertainties with regards to policies proposals and differences amid the tight race. Additionally, geopolitical uncertainties and energy price volatilities amid the escalating conflict in Middle East could impact appetite for risky assets. As such we shall remain wary on the valuations of sectors and themes that have ran ahead of fundamentals.

The month of November is expected to be volatile leading up to the US Presidential election and the announcement of the winning candidate. Once the candidate is announced, there could be some rebalancing of portfolios depending on which candidate emerges as victorious and the policies that are expected to follow. In the meantime, we continue to take this opportunity to lock in some gains and look to add on to sectors that are beneficiaries of the government initiatives on price weakness.
