What is the Fund about?

AmSustainable Series – Global Lower Carbon Equity Fund is a wholesale feeder fund issued by AmFunds Management Berhad (the "Manager") which seeks to provide long-term capital growth by investing in the HSBC Global Investment Funds – Global Lower Carbon Equity (the "Target Fund"). The Target Fund aims to provide long-term total return by investing in a portfolio of equities, while promoting environmental, social and governance ("ESG") characteristics. The Target Fund aims to do this with a lower carbon intensity, calculated as a weighted average of the carbon intensities of the Target Fund's investments.

Who is the Fund suitable for?

The Fund is suitable for Sophisticated Investors seeking:

- potential capital appreciation over a long-term investment horizon; and
- participation in the global equity market in companies that have a lower carbon intensity.

Note: Long-term refers to a period of at least five (5) years.

What am I investing in?

Fund Category	Wholesale (feeder fund).
Fund Type	Growth.
Investment Objective	The Fund seeks to provide long-term capital growth. <i>Note: Any material change to the investment objective of the Fund would require unit holders' approval.</i>
Investment Strategy	<p>The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's NAV in the Target Fund. This implies that the Fund has a passive strategy.</p> <p>The Fund is a qualified SRI fund. It invests in the Target Fund that adopts thematic investment in companies that have a lower carbon intensity. This includes screening, selection, monitoring and realization of the Target Fund's investments by the Investment Adviser. The Target Fund will adopt the following strategy to ensure that the companies that the Target Fund invests in are in line with the sustainability principles adopted and the overall impact of such investments of the Target Fund is not inconsistent with any other sustainability principles.</p> <p>The Target Fund aims to provide long-term total return by investing in a portfolio of equities, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The Target Fund aims to do this with a lower carbon intensity, calculated as a weighted average of the carbon intensities of the Target Fund's investments.</p> <p>In normal market conditions, the Target Fund invests a minimum of 90% of its net assets in accordance with the lower carbon strategy, in equities and equity-equivalent securities of companies which are domiciled in, based in, carry out the larger part of their business activities in, or are listed on a regulated market in developed market, up to 10% of its net assets, may invest in units or shares of UCITS and/or other eligible UCIs (including bank deposits and money market instruments).</p> <p>The Target Fund aims for lower exposure to carbon intensive businesses through portfolio construction.</p> <p>The Target Fund uses a multi-factor investment process, based on five factors (value, quality, momentum, low risk and size), to identify and rank stocks in its investment universe with the aim of maximising the portfolio's risk-adjusted return. Although the investment process currently uses these five factors, it is subject to ongoing research regarding the current and potential additional factors. In order to lower the exposure to carbon intensive businesses, all stocks in the portfolio are assessed for their carbon intensity. A proprietary systematic investment process is then used to create a portfolio which maximizes the exposure to the higher ranked stocks and which aims for a lower carbon intensity, calculated as a weighted average of the carbon intensities of the Target Fund's investments, than the weighted average of the constituents of the Target Fund's reference benchmark (the "Lower Carbon Strategy").</p> <p>More information on HSBC Asset Management's responsible investment policies is available at www.assetmanagement.hsbc.com/about-us/responsible-investing/policies. The policy outlines HSBC Asset Management's approach to sustainable investing, focusing on the ten principles of the UNGC. The UNGC sets out key areas of financial and non-financial risk: human rights, labour, environment and anti-corruption.</p> <p>When assessing companies' carbon intensity, the Investment Adviser may rely on expertise, research and information provided by well-established financial data providers.</p> <p>The Target Fund will not invest in companies involved in the production of tobacco or related activities.</p> <p>The Target Fund normally invests across a range of market capitalisations without any capitalisation restriction.</p>

	<p>The Target Fund may use financial derivative instruments for hedging and cash flow management (for example, Equitisation). The Target Fund may also use, but not extensively, financial derivative instruments for investment purposes. The financial derivative instruments the Target Fund is permitted to use include, but are not limited to, futures and foreign exchange forwards (including non-deliverable forwards). Financial derivative instruments may also be embedded in other instruments in which the Target Fund may invest. Financial derivative instruments may also be used for efficient portfolio management purposes.</p> <p>The Target Fund's investment strategy adopts the above investing strategy. The Investment Adviser may take temporary defensive positions that may be inconsistent with the Target Fund's investment strategy in response to adverse market, economic, political or any other market conditions. However, in such circumstances, the Target Fund will always maintain at least 90% of its net assets in accordance with the Lower Carbon Strategy, in equities and equity-equivalent securities of companies which are domiciled in, based in, carry out the larger part of their business activities in, or are listed on a regulated market in developed market.</p> <p>If the Target Fund breaches the minimum asset allocation or the Target Fund's investments become inconsistent with the sustainability criteria, the Target Fund Investment Adviser shall dispose of the investment within three (3) months from the date of breach. The disposed investment will be replaced with other investment that are in line with the Target Fund's sustainability criteria in order to maintain the minimum asset allocation of the Target Fund that are subject to the sustainable considerations at all times.</p> <p>The Fund will not be adopting any temporary defensive strategies during adverse market condition as the Fund is passively managed. Any breach as a result of:-</p> <ul style="list-style-type: none"> (i) appreciation or depreciation in value of the Fund's investments; or (ii) repurchase of units or payment made out of the Fund, <p>need not be reported to the SC and must be rectified as soon as practical within seven (7) business days from the date of the breach. The seven-business day period may be extended to three (3) months if it is in the best interest of Unit Holders and Trustee's consent is obtained. Such extension must be subject to at least a monthly review by the Trustee.</p> <p>The Manager may, in consultation with the Trustee and with the approval of the Unit Holders, terminate the Fund or replace the Target Fund with another fund that has similar objective if, in the Manager's opinion, the Target Fund no longer meets the Fund's investment objective. The replacement target fund must meet the requirements of the Guidelines on Sustainable and Responsible Investment Funds, where applicable. If the Target Fund no longer meets the requirements of the Guidelines on Sustainable and Responsible Investment Funds, the Fund's SRI status will be revoked.</p>
Asset Allocation	<ul style="list-style-type: none"> • A minimum of 85% of the Fund's NAV in the Target Fund; and • A maximum of 15% of the Fund's NAV in liquid assets such as cash and deposits. For clarification, deposit includes cash with bank which pays interest.
Base Currency of the Fund	US Dollar (USD).
Performance Benchmark	<p>MSCI World Index¹. (available at www.aminvest.com)</p> <p><i>Note: The Target Fund is not benchmarked externally. The MSCI World Index is used as reference for comparative purposes only. The risk profile of the Fund is not the same as the risk profile of the reference benchmark.</i></p>
Launch Date	23 May 2023
Initial Offer Price	<p>RM Class: RM1.0000 RM-Hedged Class: RM1.0000 USD Class: USD1.0000</p>
Income Distribution Policy	<p>Given the Fund's investment objective, the Classes of the Fund are not expected to pay any distribution. Distributions, if any, are at the Manager's discretion.</p> <p><u>RM and RM-Hedged Classes</u> Distribution, if any, can be in the form of cash (by telegraphic transfer) or units (by reinvestment into units of the respective Classes).</p> <p><u>Other Classes except for RM and RM-Hedged Classes</u> Distribution, if any, to be reinvested into units of the respective Classes.</p> <p><i>Notes: Income distribution amount (if any) for each of the Classes could be different and is subject to the sole discretion of the Manager. For RM and RM-Hedged Classes only, if income distribution earned does not exceed RM500, it will be automatically reinvested.</i></p>

Financial derivative instruments may also be embedded in other instruments in which the Target Fund may invest. Financial derivative instruments may also be used for efficient portfolio management purposes.</p> <p>The Target Fund can enter into securities lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%. The Target Fund is actively managed and does not track a benchmark. The reference benchmark is used for the Target Fund market comparison purposes.</p> <p>The Investment Adviser will use its discretion to invest in securities not included in the Target Fund's reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Target Fund's investments will be components of the Target Fund's reference benchmark. However, their weightings may deviate materially from those of the Target Fund's reference benchmark. The deviation of the Target Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.</p>

Note: Please refer to the Information Memorandum under "Information on HSBC Global Investment Funds – Global Lower Carbon Equity" for further details on the Target Fund.

Who am I investing with?

Manager	: AmFunds Management Berhad ("AFM")
Trustee	: Deutsche Trustees Malaysia Berhad
Trustee's Delegate (Custodian)	: Deutsche Bank (Malaysia) Berhad
Taxation Adviser	: Deloitte Tax Services Sdn Bhd
Auditor	: Ernst & Young PLT

All transactions with related parties are to be executed on terms which are best available to the Fund and which are not less favourable to the Fund than an arm's length transaction between independent parties. The Fund may have dealings with parties related to the Manager. The related parties defined are AmIslamic Funds Management Sdn Bhd ("AIFM"), AmInvestment Bank Berhad, AmInvestment Group Berhad, AmBank (M) Berhad and AmBank Islamic Berhad.

The Manager may conduct cross trades between funds and private mandates it currently manages provided that all criteria imposed by the regulators are met. Notwithstanding, cross trades between the personal account of an employee of the Manager and the Fund's account and between the Manager's proprietary trading accounts and the Fund's account are strictly prohibited. The execution of cross trade will be reported to the investment committee and disclosed in the Fund's report accordingly.

What are the possible outcomes of my investment?

Best Case	Capital appreciation and income distribution.
Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.
Worst Case	Capital loss and no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a wholesale fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Inflation Risk	This is the risk that Sophisticated Investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund.
Non-Compliance Risk	This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund.
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the repayments.
Country Risk	Investments of the fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in.

Specific risks associated with the Fund

Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's net asset value declines.
Risk of not meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Currency Risk	As the Fund offers multiple currency Classes, certain Class(es) would be exposed to currency risk. This is the risk associated with investments in certain Class(es) of the Fund which is denominated in currency different from the base currency of the Fund. When the base currency of the Fund depreciates against the denomination currency of certain Class(es), the Class(es) will suffer currency losses. This is in addition to any gains or losses derived from the Fund's investment in the Target Fund.
Income Distribution Risk	The distribution of income is not guaranteed.
Liquidity Risk	The Fund will be investing a minimum of 85% of its assets in the Target Fund. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund. In the event of exceptional circumstances such as suspension of calculation of net asset value of the Target Fund, no shares of the Target Fund will be redeemed.
Sustainability and Responsible Investment and Impact Risk	<p>As the Fund via investment in the Target Fund has an intention to generate positive sustainable and responsible impact alongside a financial return ("impact"), the investor must be able to accept temporary capital losses due to the potentially restricted number of companies that the Target Fund can invest in due to those companies which may not meet the sustainability considerations requirement and, consequently, should view investment in the Fund as a long-term investment.</p> <p>The Target Fund may seek to exclude holdings deemed inconsistent with the sustainability considerations. As a result, the investments of the Target Fund will be more limited than other funds that do not apply sustainability considerations. The Target Fund may be precluded from purchasing, or required to sell, certain investments that are inconsistent with its investment policy and sustainability considerations which might otherwise be advantageous to hold. The incorporation of sustainability considerations could result in performance that is better or worse than the performance of the other funds depending on the performance of the excluded investments and the investments included in place of such excluded investments of the Target Fund. The ESG Assessment Methodology such as the methodology used by the Manager for assessing the Target Fund with scoring matrix is incorporated in our investment process to mitigate this risk.</p>
Greenwashing Risk	<p>Greenwashing is defined as making false, misleading or unsubstantiated claims about the positive environmental impact of an investment product. The Fund via investment in the Target Fund may inadvertently invest into such products, without prior knowledge of the fraudulent claims. As greenwashing could result in reputational risk, regulatory fines, and/or withdrawal of the products, there could be a negative impact on the value of the Target Fund and the Fund.</p> <p>In mitigating the greenwashing risk, there are governance and guidelines in place for assessing the sustainability of the Target Fund. The methodology of ESG score for Target Fund is approved by appropriate approving authority internally, and the ESG score for Target Fund is updated periodically if there is changes, i.e. on a monthly basis. The Manager also will monitor any negative news to the Target Fund and Investment Adviser in relation to greenwashing.</p>

² The Target Fund aims for at least 50% carbon intensity reduction using S&P Trucost data, but this level is not guaranteed and may be subject to change. This is defined as the carbon emissions scope 1 + scope 2 (in tonnes) divided by the sales (in USD million) for each stock (expressed in Co2e / USD million revenue). Fund and benchmark values are aggregated on a weighted mean basis. Scope 1 is greenhouse gas emissions generated from burning fossil fuels and production processes which are owned or controlled by the companies and scope 2 is greenhouse gas emissions from consumption of purchased electricity, heat or steam by the companies. This methodology and metric are aligned to the Task Force on Climate-Related Financial Disclosures ("TCFD"). With regard to the level of carbon intensity, the carbon intensity targets are integrated into the investment process of the Target Fund at the optimisation stage, applying an overall carbon intensity target for the entire investment portfolio of at least 50% reduction relative to the benchmark. This is achieved by integrating the portfolio-level carbon intensity constraint into the investment management process of the Target Fund. Thus, the Target Fund has an overall carbon intensity target to reduce the entire investment portfolio's carbon intensity score by at least 50% (S&P Trucost carbon emissions scope 1 + 2 scores) versus the benchmark.

³ The following is the summary of the quantitative investment process of the Target Fund:

Step 1: Universe Ranking and Score Optimisation - The starting universe to construct the strategy is a list of investable stocks excluding companies involved in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions, anti-personnel mines, biological weapons, blinding laser weapons, chemical weapons and non-detectable fragments. Each stock in the universe is ranked from most to least attractive based on the five composite factors defined below.

Factor Definition - The multi-factor equity strategy is based on five well-established factors: value, quality, momentum, low risk and size.

- ◆ **Value:** a composite value metric that differentiates between "expensive" and "cheap" stocks.
- ◆ **Quality:** a composite fundamental metric targeting companies that generate substantial profits both efficiently and sustainably.
- ◆ **Momentum:** a composite measure that differentiates stocks / sectors that have risen over the past 12-months from those that fell.
- ◆ **Low Risk:** a statistical metric that distinguishes between riskier and less risky stocks.
- ◆ **Size:** a composite that distinguishes between large and small cap stocks.

Step 2: Portfolio Optimisation - Once the final ranking is determined, based on the multi-factor model, a portfolio optimisation process builds the final portfolio for implementation. The process also leverages the proprietary risk model and cutting-edge data infrastructure to ensure stability and speed for model portfolio production. The customised ESG criteria (sustainable exclusion but also profile enhancement) and carbon intensity reduction are seamlessly integrated into the optimisation process at this stage.
