Who is the Fund suitable for?

The Fund is suitable for sophisticated investors seeking:

- regular income and long-term capital growth on their investments; and
- investment exposure to global equities.

What am I investing in?

| Fund Category | Wholesale (Feeder Fund) | | | | | | | |
|---------------------------|---|--|----------|-----------------|-----------|----------|-----------|-----------|
| Fund Type | Income and Growth | | | | | | | |
| Investment Objective | <p>The Fund aims to provide income* and long-term** capital growth by investing in the Target Fund which invests in global equities.</p> <p><i>Notes:</i> Any material change to the investment objective of the Fund would require Unit Holders' approval. * The income could be in the form of units or cash. ** Long term refers to an investment horizon of at least five (5) years.</p> | | | | | | | |
| Investment Strategy | <p>The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's NAV in the Fidelity Funds – Global Dividend Fund ("Target Fund") at all times. This implies that the Fund has a passive strategy</p> <p><i>Note:</i> A replacement of this Target Fund would require Unit Holder's approval.</p> | | | | | | | |
| Asset Allocation | Target Fund | A minimum of 85% of the Fund's NAV | | | | | | |
| | Liquid assets | A maximum of 15% of the Fund's NAV <i>Note:</i> The limits on the asset allocation of the Fund may be temporarily exceeded as a result of price movements or due to reasons beyond the control of the Manager. The Manager will rectify such situation within seven (7) business days, taking due account of the interest of its Unit Holders. | | | | | | |
| Base Currency of the Fund | US Dollar (USD) | | | | | | | |
| Performance Benchmark | MSCI All Countries World Net Index (available at www.aminvest.com) <i>Note:</i> The MSCI All Country World Net Index ("MSCI ACWI") is only used as a reference for investment performance comparison purpose. The Fund is not managed against MSCI ACWI. The risk profile of the Fund is not the same as the risk profile of the MSCI ACWI. | | | | | | | |
| Risk Category | High. | | | | | | | |
| Initial Offer Price | <table border="1"> <thead> <tr> <th>RM Class</th> <th>RM-Hedged Class</th> <th>USD Class</th> </tr> </thead> <tbody> <tr> <td>RM1.0000</td> <td>RM 1.0000</td> <td>USD1.0000</td> </tr> </tbody> </table> | | RM Class | RM-Hedged Class | USD Class | RM1.0000 | RM 1.0000 | USD1.0000 |

| RM1.0000 | RM 1.0000 | USD1.0000 | | | | | | |
| Distribution Policy | <u>RM & RM-Hedged Classes</u> Subject to availability of income, distribution will be paid quarterly and can be in the form of cash (by telegraphic transfer) or units. | | | | | | | |

| | |
|-------------|--|
| | <p>Other Classes except for RM & RM-Hedged Classes Subject to availability of income, distribution will be paid at least quarterly and will be reinvested into the respective Class.</p> <p>At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital.</p> <p>Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.</p> <p><i>Notes:</i> <i>Income distribution amount (if any) for each of the Classes could be different subject to the sole discretion of the Manager.</i> <i>For RM and RM-Hedged Classes only, if income distribution earned does not exceed RM500, it will be automatically reinvested.</i></p> |
| Launch Date | 11 April 2016 |

What are the possible outcomes of my investment?

| | |
|------------|--|
| Best Case | Capital appreciation and income distribution. |
| Mid Case | No significant change in investment i.e. no capital appreciation and no income distribution. |
| Worst Case | Capital loss and no income distribution. |

What are the key risks associated with this product?

General Investment Risks

| | |
|---------------------|---|
| Market Risk | This is the risk of prices of assets falling in response to general market factors such as economic factors, socio-political environment, regulatory factors and broad investor sentiment. |
| Inflation Risk | This is the risk that investors' investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. |
| Non-Compliance Risk | This is the risk of the Manager or the Trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the Fund. |
| Country Risk | Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. |
| Financing Risk | This is the risk of investing with borrowed money, which includes the investor's inability to service the loan repayments and the adverse impact of an increase in interest rate on the loan repayments, where the investor may be subject to higher loan repayment installments. |

Specific Risks associated with the Fund

| | |
|---|--|
| Risk of a Passive Strategy | As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's net asset value declines. |
| Risk of Not Meeting the Fund's Investment Objective | This is the risk that the Fund may deviate from the intended investment objective. |
| Currency Risk | <p><i>Unhedged Class(es):</i> This is the risk associated with investments in certain Class(es) of the Fund which is denominated in currency different from the base currency of the Fund. When the base currency of the Fund depreciates against the denomination currency of certain Class(es), the NAV of the unhedged Class(es) will be adversely affected when the base currency of the Fund is expressed in the denomination currency of the unhedged Class(es). This is in addition to any gains or losses derived from the Fund's investments in the Target Fund.</p> <p><i>Unhedged class denominated in USD:</i> Note that the unhedged class which is denominated in USD is not exposed to currency risk as the base currency of the Fund is also denominated in the same currency.</p> <p><i>Hedged Class(es):</i> The Manager will hedge as much as practicable the currency risk associated with investments in the hedged Class(es) against the base currency of the Fund. As such, currency risk will be substantially minimized. Note that while hedging will substantially protect investors in the hedged Class(es) against a decrease in the value of the base currency of the Fund relative to the denomination currency of the hedged Class(es), it also preclude investors of the hedged Class(es) to benefit from an increase in the value of the base currency of the Fund.</p> |
| Distribution Risk | <p>It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realised gains or realised income to enable income distribution. The Fund may distribute from its realised gain, realised income and capital.</p> <p>Capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.</p> |
| Liquidity Risk | The Fund will be investing a minimum of 85% of its NAV in the Target Fund. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund. In the event of exceptional circumstances such as suspension of calculation of NAV of the Target Fund, no shares of the Target Fund will be redeemed. |

Specific Risks associated with the Target Fund

| | |
|--|--|
| Historical Performance | Past performance is not a guarantee of future returns. |
| Fluctuation in Value | There can be no assurance that any appreciation in value of investments will occur, and the capital value of the original investment with the Target Fund is not guaranteed. |
| Termination of Target Fund and Classes of Shares | In the event of the termination of the Target Fund or a class of shares, the assets of the Target Fund or the class will be realised, the liabilities discharged and the net proceeds of realisation distributed to shareholders in proportion to their holding of shares in the Target Fund or class. |
| Legal and Tax Risks | In some jurisdictions the interpretation and implementation of laws and regulations and the enforcement of shareholders' rights under such laws and regulations may involve significant uncertainties. |
| Foreign Currency Risk | The Target Fund's total return and balance sheet can be significantly affected by foreign exchange rate movements if the Target Fund's assets and income are denominated in currencies other than the base currency of the fund and this means that currency movements may significantly affect the value of the Target Fund's share price |

| | |
|---------------------------------------|---|
| Liquidity Risk | Investments held by the Target Fund may need to be sold if insufficient cash is available to finance huge redemptions. If the size of the disposals is sufficiently large, or the market is illiquid, then there is a risk that either the investments might not be sold or the price at which they are sold may adversely affect the net asset value of the Target Fund. |
| Pricing and Valuation Risk | The Target Fund may invest in unquoted and/or illiquid investments which will increase the risk of mispricing. |
| Counterparty Credit & Settlement Risk | There is a risk of loss if a counterparty fails to perform its financial or other obligations to the Target Fund, for example, the possibility that a counterparty may default, by failing to make payments due, or make payments in a timely manner. |
| Securities Lending | Securities lending involves risks in that (a) if the borrower of securities lent by the Target Fund fails to return them, and (b) delays in the return of securities on loans may restrict the ability of the Target Fund to meet delivery obligations under security sales. |
| Investment Horizon Risk | The selection of investments for the Target Fund is undertaken according to the Target Fund's investment objectives and may not closely align with investors' investment horizon. |
| Cross Share Class Liability | If the liabilities of a class of shares exceed its assets, creditors of such class may have recourse without restriction to assets which are attributable to the other classes of shares within the same fund. |
| Equity Related Risk | As the Target Fund invests in stocks, the value of those stocks may fluctuate, sometimes dramatically, in response to the activities and results of individual companies or because of general market and economic conditions or other events. |
| Distribution Out of Capital Risk | For certain classes of shares, dividends may be paid out of capital where the income/capital gain generated by the Target Fund is insufficient to pay a distribution as declared. |
| Derivatives Related Risk | The Target Fund may use various financial derivative instruments to reduce risks or costs or to generate additional capital or income in order to meet the investment objectives of the Target Fund. |

Note: The abovementioned risks which sophisticated investors should consider before investing into a wholesale fund should not be considered to be an exhaustive list. Sophisticated investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Sophisticated investors are advised to consult their professional adviser. Please refer to the Information Memorandum under "Risk Factors" for further details on risks.

Please note that if you invest in units through a distributor via a nominee system of ownership, you will not be deemed a unit holder under the deed of the Fund.
