Shariah Guidelines associated with the Target Fund

The Crescent range is managed in accordance to investment guidelines established by the Shariah Advisory Board, which excludes any stock whose primary business is impermissible according to the Shariah Guidelines.

Businesses which are inconsistent with Shariah Guidelines are: alcohol, tobacco, pork-related products, financial services (banking, insurance, etc), and entertainment (casinos/gambling, pornography, etc).

Companies that do not comply with the Shariah Guidelines are removed from the investment universe. After removing those companies, the remaining stocks in the universe are evaluated according to several financial ratio filters. These ratios have been designed to filter out companies that hold unacceptable levels of debt or "impure" interest income.

The financial filters are as follows:

1. Total debt divided by trailing 12-month average market capitalisation or total assets should not be greater than or equal to 33%.
2. The sum of cash and interest bearing securities divided by trailing 12-month average market capitalisation or total assets should not be greater than or equal to 33%.
3. Accounts receivables divided by market capitalization total assets should not be greater than or equal to 45%.

Shariah-compliant equities will often yield small percentages of income that is considered "impure" by Shariah standards and that must be than purified. Such "impure" earnings must be quantified and purified. The sources of such income might include non-operating income from interest bearing investments or earnings from prohibited business activities that are beyond the scope of the company's primary business.

The responsibility of the Shariah Advisory Board is to ensure that all such income is calculated by the Target Fund and that a corresponding percentage is deducted from the earnings passed on to investors through dividends, thereby ensuring that these are free from impurities. Non-permissible income is stripped from the Target Fund and is thereafter transferred to a charitable trust fund set up by the Oasis Group.

What are the possible outcomes of my investment?

Best Case	Capital appreciation and income distribution.
Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.
Worst Case	Capital loss and with no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deeds, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in.

Specific risks associated with the Fund

Currency Risk	As the investments of the Fund will be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments.
Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines.
Risk of Not Meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Shariah Non-Compliance Risk	This is the risk of the Fund not conforming to Shariah Investment Guidelines. Non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfill a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.

Specific risks associated with the Target Fund

Settlement and Credit Risks	The trading and settlement practices of some of the stock exchanges or markets on which the Target Fund may invest may not be the same as those in more developed markets, which may increase settlement risk and/or result in delays in realising investments made by the Target Fund.
Regulatory Risk and Accounting Standards	Disclosure and regulatory standards may be less stringent in certain securities markets than they are in developed countries and there may be less publicly available information on the issuers than is published by or about issuers in such developed countries. Consequently some of the publicly available information may be incomplete and/or inaccurate.
Political Risk	The performance of the Target Fund may be affected by changes in economic and market conditions, uncertainties such as political developments, changes in government policies, the imposition of restrictions on the transfer of capital and in legal, regulatory and tax requirements.
Custody Risk	Local custody services remain underdeveloped in many emerging market countries as compared to developed countries and there is a transaction and custody risk involved in dealing in such markets. In certain circumstances the Target Fund may not be able to recover or may encounter delays in the recovery of some of its assets.
Currency Risk	The NAV per share of the Target Fund will be calculated in a particular currency whereas the Target Fund's investments may be acquired in a wide range of different currencies some of which may be affected by currency movements of a more volatile nature, some of which may not be freely convertible.
Liquidity Risk	Investment in emerging markets tend to have a greater level of risk and volatility associated with them and to be less liquid than more established markets. Investors should consider whether or not investment in the Target Fund is either suitable or should constitute a substantial part of their portfolio.

Note: The abovementioned risks which investors should consider before investing into a unit trust fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser. Please refer to the Prospectus under "Risk Factors" and "The Information on the Target Fund" for further details on risks.
