What is the Fund about?

US-Canada Income and Growth is a wholesale feeder fund issued by AmFunds Management Berhad (the "Manager") that seeks to provide regular income* and to a lesser extent long term** capital appreciation by investing in the Allianz Income and Growth (the "Target Fund"), which invests in equities securities, debt securities and convertible securities.

Who is the Fund suitable for?

The Fund is suitable for Sophisticated Investors seeking:

- regular income* and to a lesser extent long term** capital appreciation on their investments; and
- an investment portfolio of equities securities, debt securities and convertible securities via the Target Fund.

Notes:

* Income distribution (if any) is paid out on a quarterly basis.

** Long term means the investment horizon should at least be five (5) years.

What am I investing in?

Fund Category	Wholesale (Feeder Fund)
Fund Type	Income and Growth
Investment Objective	<p>The Fund seeks to provide regular income* and to a lesser extent long term** capital appreciation by investing in the Target Fund, which will be investing in equities securities, debt securities and convertible securities.</p> <p>Notes: * Income distribution (if any) is paid on a quarterly basis. ** Long term means the investment horizon should at least be five (5) years. Any material change to the investment objective of the Fund would require unit holders' approval.</p>
Investment Strategy	<p>The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's net asset value (NAV) in the Allianz Income and Growth at all times. This implies that this Fund has a passive strategy.</p> <p>Note: A replacement of the Target Fund or termination of the Fund would require unit holders' approval.</p>
Asset Allocation	<ul style="list-style-type: none"> • A minimum of 85% of the Fund's NAV will be invested in the Target Fund; and • Up to 15% of the Fund's NAV will be invested in liquid assets. <p>Note: The limits on the asset allocation of the Fund may be temporarily exceeded as a result of price movements or due to reasons beyond the control of the Manager. The Manager will rectify such situation within 7 business days, taking due account of the interest of its unit holders.</p>
Base Currency of the Fund	Ringgit Malaysia (RM)
Performance Benchmark	<p>S&P 500 Index¹</p> <p>Note: The S&P 500 Index is only used as a reference for investment performance comparison purpose. The Fund is not managed against the S&P 500 Index. The risk profile of the Fund is not the same as the risk profile of the S&P 500 Index.</p>
Launch Date	17 June 2014
Initial Offer Price	RM1.0000 per unit
Distribution Policy	Subject to availability of income, distribution will be paid on a quarterly basis.

	<p>At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital.</p> <p>Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.</p>

What are the possible outcomes of my investment?

Best Case	Income distribution and capital appreciation.
Mid Case	No significant change in investment i.e. no income distribution and no capital appreciation.
Worst Case	Capital loss and no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a wholesale fund

Market Risk	This is the risk of prices of assets falling in response to general market factors such as economic factors, socio-political environment, regulatory factors and broad investor sentiment.
Mismatch Risk	This is the risk that the Fund chosen by the investor may not be suitable for the needs and circumstances of the investor.
Inflation Risk	This is the risk that investors' investment in the Fund may not grow or generate income at a rate that keeps pace with inflation.
Non-Compliance Risk	This is the risk of the Manager or the Trustee not complying with internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators, which may adversely affect the performance of the Fund.
Financing Risk	This is the risk of investing with borrowed money, which includes the investor's inability to service the loan repayments and the adverse impact of an increase in interest rate on the loan repayments, where the investor may be subject to higher loan repayment installments.

Specific risks associated with the Fund

Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's net asset value declines.
Risk of Not Meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Currency Risk	This is the risk associated with investments that are denominated in currencies that are different from the base currency of the Fund. When the currency of foreign investments depreciates against the base currency of the Fund, the Fund will suffer currency losses. This is in addition to any gains or losses derived from the Fund's investment in the Target Fund.
Liquidity Risk	The Fund will be investing a minimum of 85% of its NAV in the Target Fund. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund.
Regulatory and Legal Risk	The value of the Fund's investments may be affected by uncertainties such as political developments, changes in government policies, changes in taxation, restrictions on repatriation of investment proceeds and other developments in the law and regulations of Luxembourg in which the Fund's investments are made.
Taxation Risk	This is the risk that the proceeds from the sale of securities and/or the receipt of income may be subject to tax, levies, duties or other charges imposed by the authorities in Luxembourg.
Distribution Risk	It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realised gains or realised income to enable income distribution. The Fund may distribute from its realised gain, realised income and capital. Capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.
